1. INTRODUCTION

Welcome to the D-Tech Application Manager User Guide. The D-Tech Application Manager is used to download and install licenced D-Tech software products. This document details how to use the D-Tech Application Manager and will take you through the steps required to download and install the application, as well as how to activate licences for D-Tech's PC software and obtain access to the associated applications.

Before starting the process of downloading, please save any licence file(s) received to an accessible directory on your PC.

2. INSTALLATION

To install the D-Tech Application Manager, click on the link below, which should open your default browser and begin the download process. If that does not happen, please copy the entire text and paste it into the address bar of your web browser.

<http://dtechdrillingtechnical.com/software/applicationmanager/applicationmanagersetup.exe>

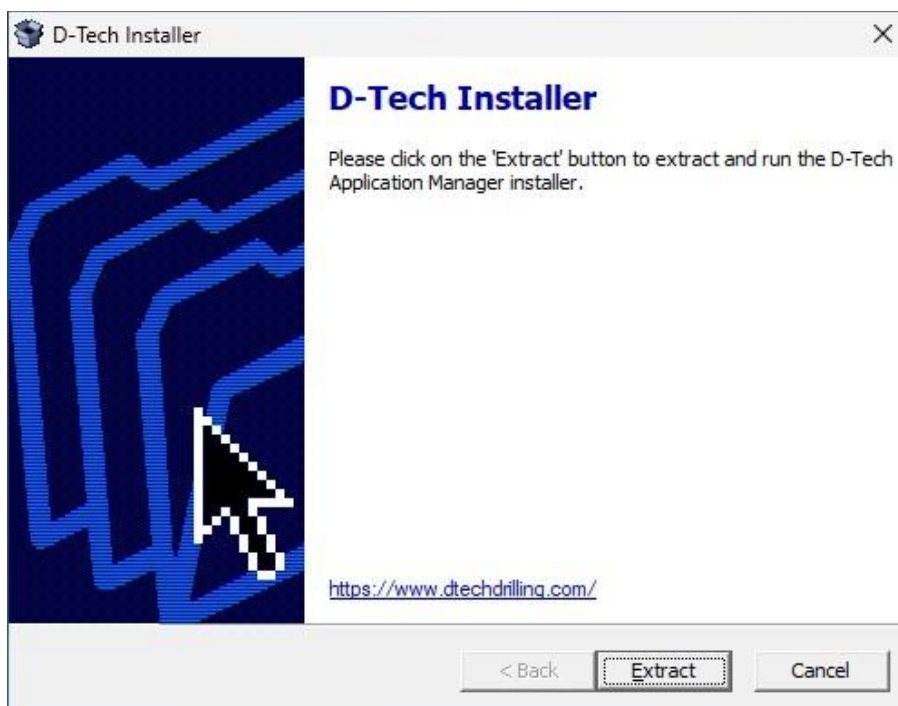

2.1. DOWNLOAD

Once the download is complete, navigate to the folder containing the downloaded file applicationmanagersetup.exe and double-click on this file.

At this point, dependent on your IT credentials, a prompt may appear requesting an Administrator username and password – please note that this username and password will relate to the IT security implemented by your company and you should contact your IT department to either provide elevated user access, or to enter credentials that will allow the application to run.

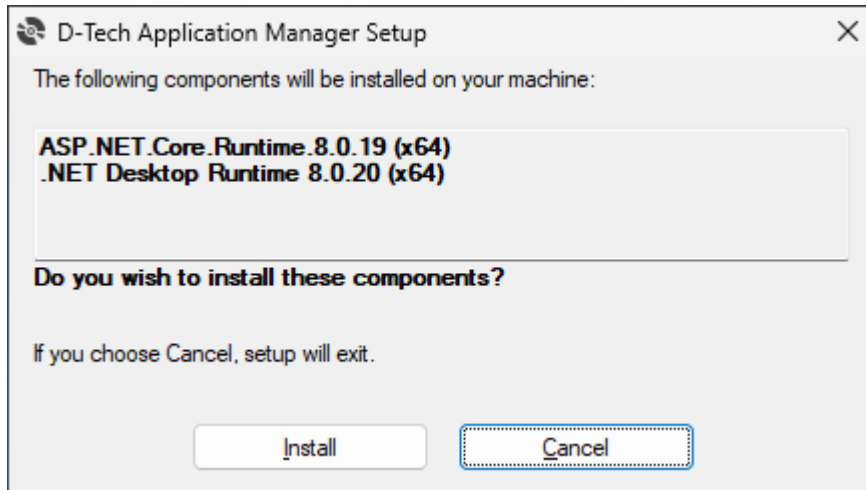

If your IT department did need to enter credentials for you at this stage, please be aware that they may need to be entered again along the process.

Click on the 'Extract' button when the window shown below is displayed, this will extract the D-Tech Application Manager installer and launch it.

2.2. INSTALLING

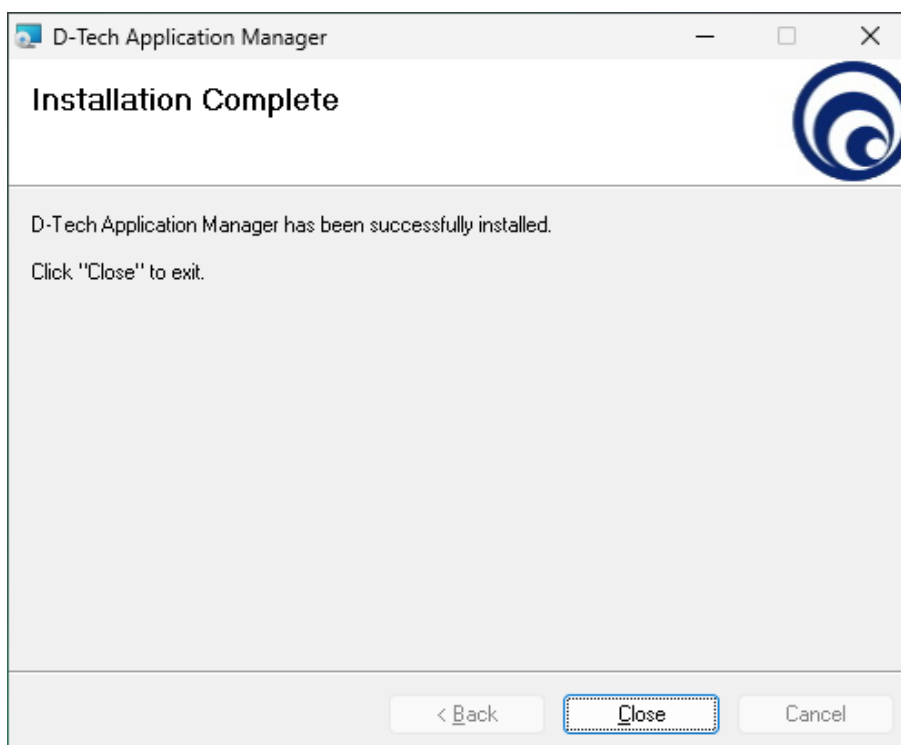

Before the D-Tech Application Manager installation starts, Windows may prompt you to install some pre-requisite components. If it does, then a window like the one shown below will be displayed. Please click on the 'Install' button to ensure the D-Tech Application Manager can run correctly.

Please ensure that the intall window displays D-Tech Application Manager or D-Tech Application Manager Setup – if any other text is displayed please refer to the Troubleshooting section (2.4 below).

When the D-Tech Application Manager installer starts it will ask you to accept the terms of the D-Tech software licence agreement. Follow the instructions on each screen to complete the installation.

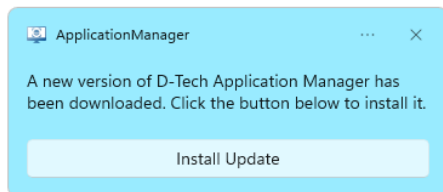

Once the software installation is complete the window shown below is displayed. Click on the 'Close' button to finish the process and exit the installation wizard.

2.3. SOFTWARE UPDATES

D-Tech regularly releases new versions of software containing new features. To obtain these updates the PC running the D-Tech software must be connected to the internet, which will allow the software to update itself automatically.

The Application Manager will automatically download any new updates and then display a Windows notification as shown below. Click on the 'Install Update' button to update the Application Manager to the new version. The Application Manager will automatically close to allow the update to happen.

2.4. TROUBLESHOOTING

There is an issue with installing onto Microsoft Windows related to the extraction of the files needed to complete the installation, which results in previous setup.exe files that originate from the same domain sometimes being accessed by the installer instead of the newly extracted one.

This will result in the name of the old software will be displayed in the title of the install window.

Should a name other than D-Tech Application Manager be shown when performing the installation, please cancel that installation and follow these steps:

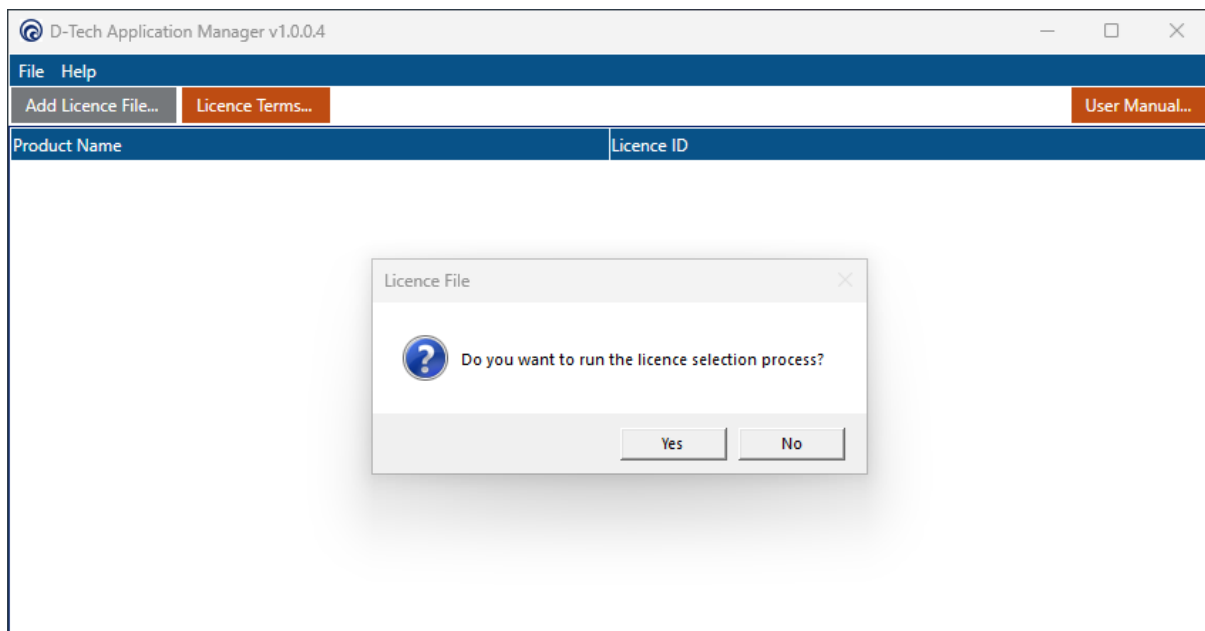

- Open Windows File Explorer 
- Navigate to the folder **C:\D-Tech\ApplicationManager**
- The folder should contain two files only: ApplicationManagerSetup.msi & setup.exe
- Double-click on **setup.exe**, which will open the install window for Application Manager as seen in the Installing section (see 2.2 above)

3. OPERATION

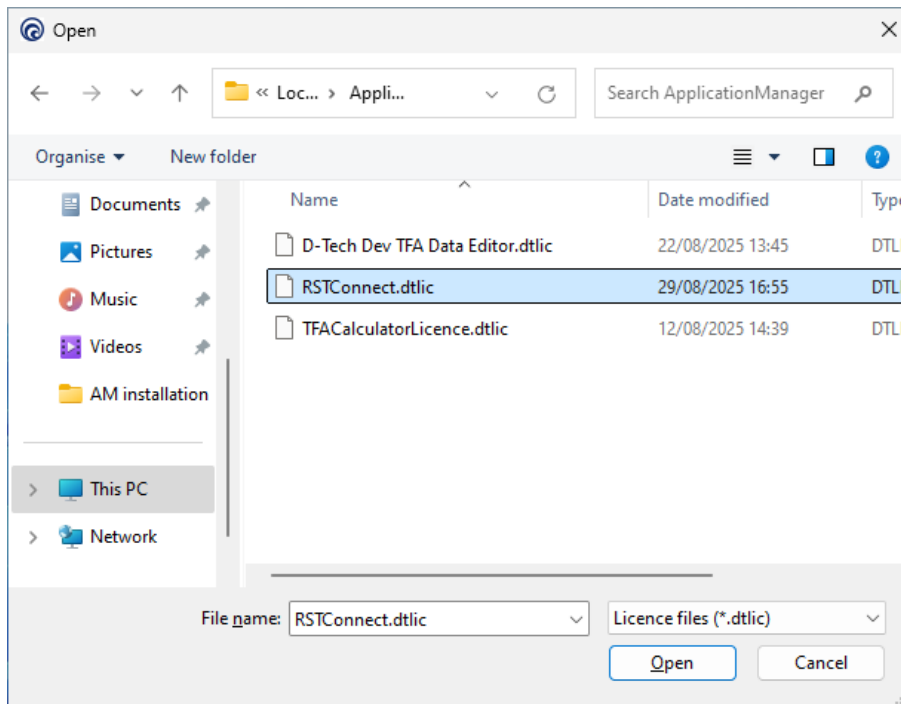

Once the installation process is complete, the D-Tech Application Manager will be launched automatically. To subsequently run the program, it can be launched using the desktop icon or start menu short cut that were created during the installation. Dependent on your IT credentials, a prompt may appear requesting an Administrator username and password – please note that this username and password will relate to the IT security implemented by your company and you should contact your IT department to either provide elevated user access, or to enter credentials that will allow the application to run.

3.1. FIRST USE

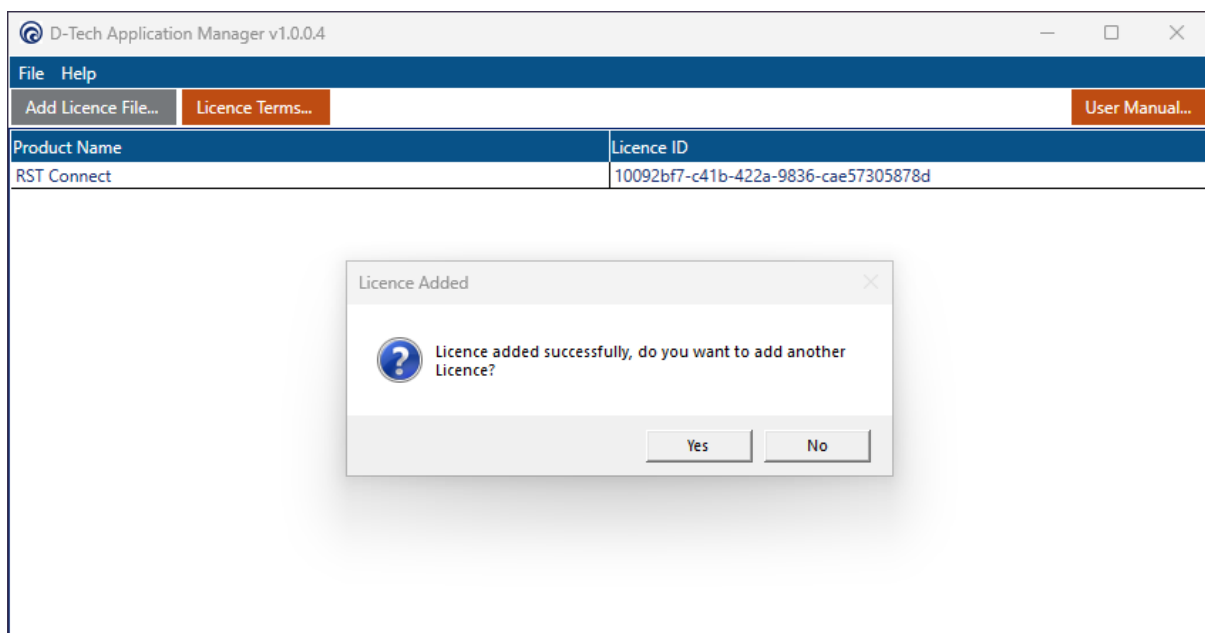

The first time the D-Tech Application Manager is used it will ask if you want to run the licence selection process as shown below. Please click on the 'Yes' button.

A file browser is displayed as shown below. Browse to the licence file you wish to install. Multiple licence files can be selected. Click the 'Open' button after selecting the licence file(s).

After selecting the licence file or files, the D-Tech Application Manager will display the product the licence file relates to in a list and asks if there are any additional licences that you wish to add as shown below. If all the licence files have already been selected click on the 'No' button to dismiss the prompt.

Skip to section 3.3 of this user guide.

3.2. SUBSEQUENT USE

When the D-Tech Application Manager is launched it fetches the list of licences installed on the D-Tech Licence Server. It will then check if the software for each licence is installed and the latest version, if not, it progresses to the next step – see section 3.3 below. Any software products that are already installed and the latest version will display the status 'Already Installed'.

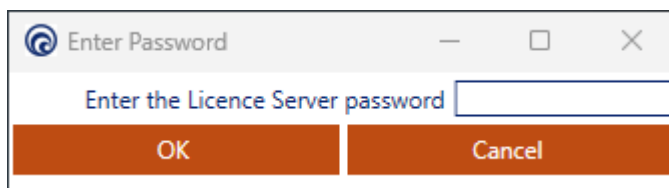

If you wish to add a new licence, click on the 'Add Licence File...' button.

3.3. DOWNLOAD AND INSTALLATION

The D-Tech Application Manager calls the D-Tech cloud service to validate the selected licences and provided they are valid the installation package for the product is downloaded as shown below. It may take several minutes to download the installation package(s) depending on the performance of your PC and internet connection.

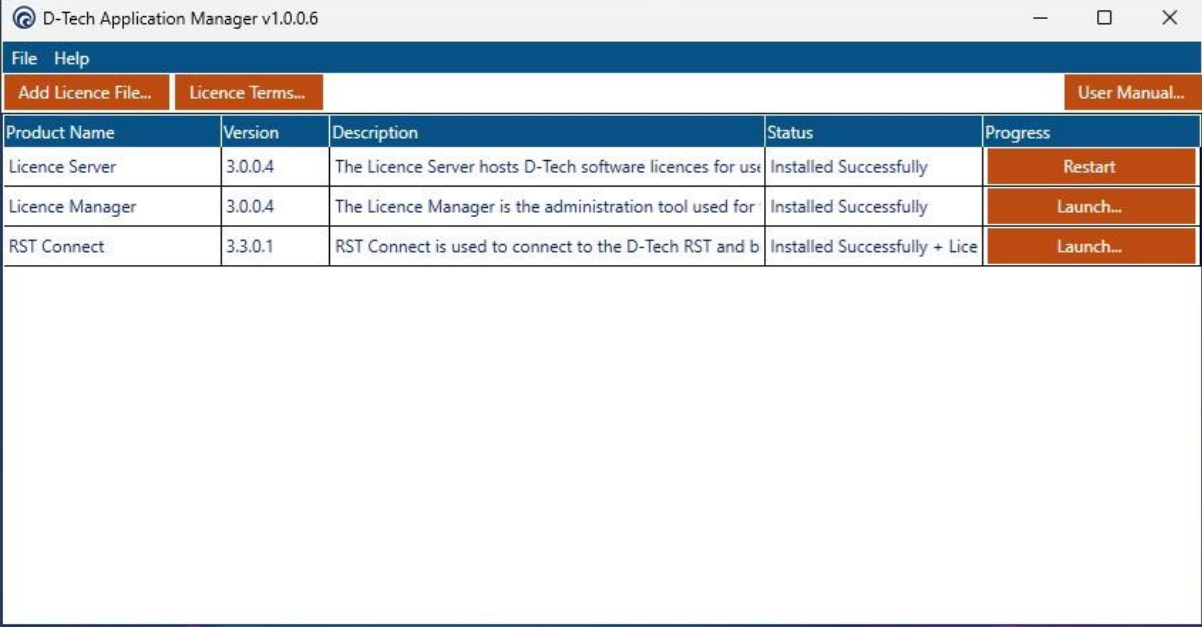

Once all the packages have been downloaded the D-Tech Application Manager will install them one by one. When all the software installations are complete the D-Tech Application Manager adds any new licences to the D-Tech Licence Server. If the D-Tech Licence Server password has been changed the D-Tech Application Manager will prompt you for the password as shown below. Enter the password and click on the 'OK' button. Clicking the 'Cancel' button will skip adding the new licence(s) to the D-Tech Licence Server.

3.4. LAUNCHING SOFTWARE

The installed software can be launched from the D-Tech Application Manager by clicking on the 'Launch...' button for the relevant product as shown below. The D-Tech Licence Server can also be restarted by clicking on the 'Restart' button.

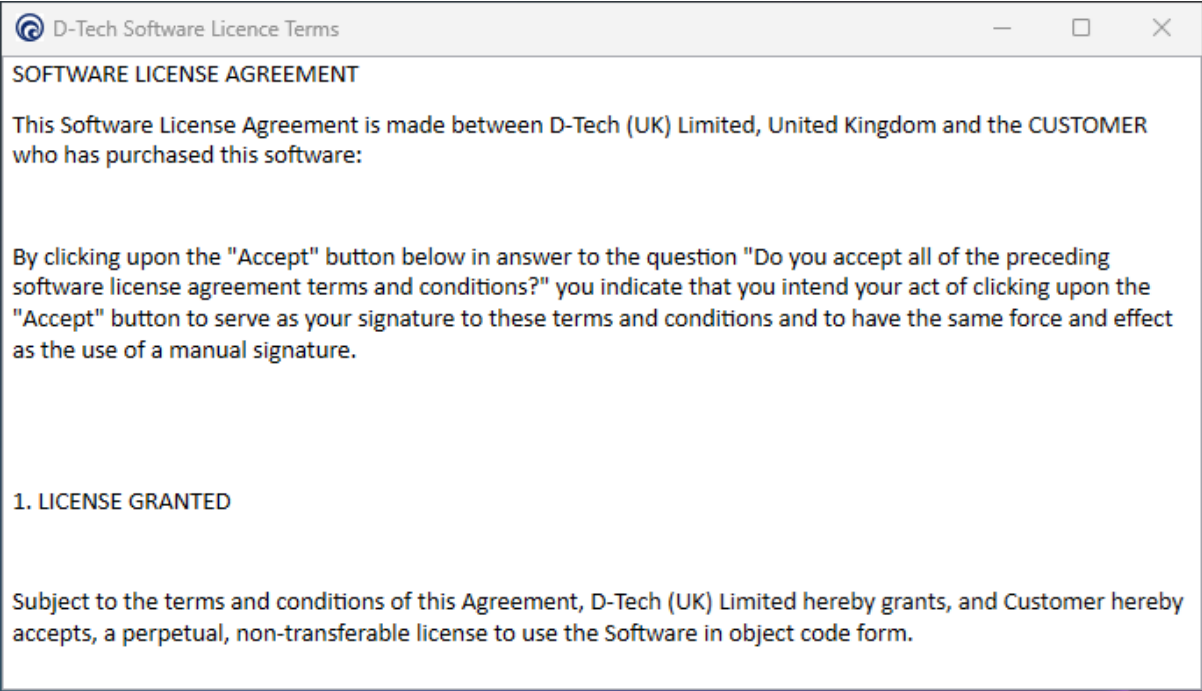

The screenshot shows the 'D-Tech Application Manager v1.0.0.6' window. It has a menu bar with 'File' and 'Help'. Below the menu bar are three buttons: 'Add Licence File...', 'Licence Terms...', and 'User Manual...'. The main area contains a table with the following data:

Product Name	Version	Description	Status	Progress
Licence Server	3.0.0.4	The Licence Server hosts D-Tech software licences for use	Installed Successfully	Restart
Licence Manager	3.0.0.4	The Licence Manager is the administration tool used for	Installed Successfully	Launch...
RST Connect	3.3.0.1	RST Connect is used to connect to the D-Tech RST and b	Installed Successfully + Lice	Launch...

3.5. LICENCE TERMS

The terms of the D-Tech software licence can be viewed by clicking on the 'Licence Terms...' button. The terms are opened in a new window as shown below.

The screenshot shows the 'D-Tech Software Licence Terms' window. It contains the following text:

SOFTWARE LICENSE AGREEMENT

This Software License Agreement is made between D-Tech (UK) Limited, United Kingdom and the CUSTOMER who has purchased this software:

By clicking upon the "Accept" button below in answer to the question "Do you accept all of the preceding software license agreement terms and conditions?" you indicate that you intend your act of clicking upon the "Accept" button to serve as your signature to these terms and conditions and to have the same force and effect as the use of a manual signature.

1. LICENSE GRANTED

Subject to the terms and conditions of this Agreement, D-Tech (UK) Limited hereby grants, and Customer hereby accepts, a perpetual, non-transferable license to use the Software in object code form.

4. CONTROLS

4.1. MENUS

4.1.1. FILE

4.1.1.1. ADD LICENCE FILE

Clicking this menu opens the file browser window.

4.1.1.2. EXIT

Clicking this menu or pressing Alt+F4 closes the D-Tech Application Manager software.

4.1.2. HELP

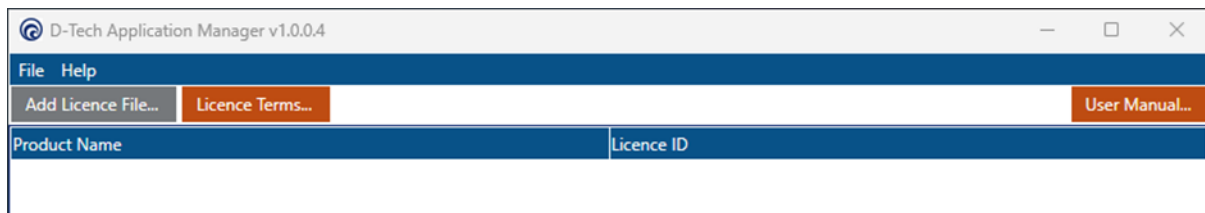

4.1.2.1. USER MANUAL

Clicking this menu or pressing CTRL+F1 opens the user manual.

4.1.2.2. ABOUT

Clicking this menu displays the about window that contains information about the D-Tech Application Manager version etc.

4.2. GENERAL

4.2.1. ADD LICENCE FILE

Clicking this button opens the file browser window.

4.2.2. LICENCE TERMS

Clicking this button opens the licence terms window.

4.2.3. USER MANUAL

Clicking this button opens the user manual.

4.2.4. LICENCE TABLE

During the licence selection process the main window displays the licence data as shown below.

Product Name	Licence ID
RST Connect	10092bf7-c41b-422a-9836-cae57305878d

The data displayed in the table is as follows

- Product Name, the name of the D-Tech software from the licence file.
- Licence ID, the unique licence ID.

4.2.5. PROGRESS TABLE

When the D-Tech Application Manager is downloading and installing the D-Tech software the main window displays the progress as shown below.

Product Name	Description	Status	Progress
Licence Server	The Licence Server hosts D-Tech software licences for use by li	Installed Successfully	Restart
Licence Manager	The Licence Manager is the administration tool used for the m	Installed Successfully	Launch...
RST Connect	RST Connect is used to connect to the D-Tech RST and bootlo	Installed Successfully + Licence	Launch...

The data displayed in the table is as follows

- Product Name, the name of the D-Tech software from the licence file.
- Description, a description of the D-Tech software product.
- Status, the status of the download and installation of the software product.
- Progress, the progress of the download/installation and the action after installation.

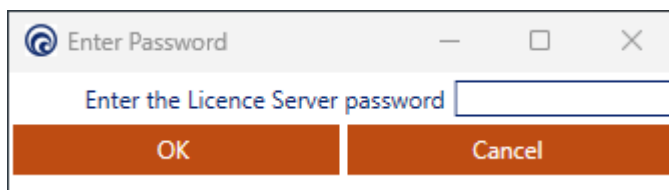

4.2.5.1. RESTART

Clicking this button restarts the D-Tech Licence Server.

4.2.5.2. LAUNCH

Clicking this button launches the selected D-Tech software package.

4.3. ENTER PASSWORD

4.3.1. SERVER PASSWORD

Enter the server password in this field.

4.3.2. OK

Click this button to confirm the password entered and close the window.

4.3.3. CANCEL

Click this button to close the password window without confirming the password.

4.4. LICENCE FILE

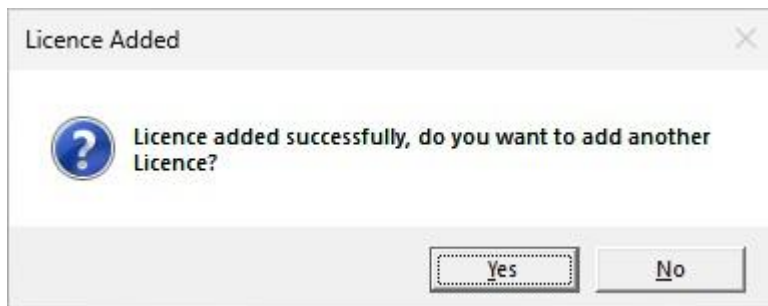

4.4.1. YES

Click this button to open the file browser window.

4.4.2. NO

Click this button to skip browsing for a licence file.

4.5. LICENCE ADDED

4.5.1. YES

Click this button to open the file browser window.

4.5.2. NO

Click this button to skip browsing for a licence file.
